The 2008–2009 financial year showed 25% gross profit growth from previous financial year.

Key business concerns/task

Although the organisation has grown over recent years, the board of directors are very concerned about the current profitability of the business. Preliminary gross profit trend for the last four financial years appears below.

A key priority of the business is to increase profit for the next financial year. Management is concerned about high cost of goods sold and whether current profit margins on sales are sustainable. Unforeseen technological change and subsequent obsolescence of current stock has seen the company heavily discounting hard drive sales, for example.

A secondary but related concern is low cash flow from operational activity.

The business currently has a superb and valuable relationship with its suppliers, who are able to provide the Packett Packaging with stock very quickly. The board is keen to maintain this relationship and not to risk any supplier relationship unnecessarily.

The board is also enthusiastic about achieving results as soon as possible within the next financial year. Any recommendation with a longer timeframe should be set as a lower priority.

In order to address the concerns of the board, management requests you to prepare a report on the year-end financial position of Packett Packaging. The report should contain:

- an Executive Summary
- analysis including budget analysis, ratios, trends, etc. (approximately 1–2 pages)
- Prioritised recommendations (3–4 brief recommendations)
- Financial Statements
